Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/5/10 has been entered.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-6, 11-13, 15, 16, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishiwaki et al. (US 6,516,539), herein Nishiwaki.

Nishiwaki discloses a shoe sole having an outer sole (outsole), a midsole (upper layer 3) attached to the outer sole, and a reinforcing member (lower layer 2). The midsole has a first arch (top portion 32) formed of a resin foam. The reinforcing member has a second arch (top portion 22) covered by the first arch. The reinforcing member is arranged so that the top surface of the second arch is not in contact with part of the bottom surface of the first arch (at gap 4); the two arches are vertically spaced from one another with no intervening structure there between. The non contact areas of the arches can therefore deform independently of one another (column 5, lines 12-34; Fig.

1, 10). The Young's modulus of the reinforcing member is greater than the Young's modulus of the first arch (column 6, lines 14-24). The first arch and the reinforcing member may be formed of a foam ethylene-vinyl acetate copolymer (column 6, lines 34-37). The reinforcing member has medial and lateral side portions. The outer sole would be separated into a fore and rear foot parts, with the reinforcing member sandwiched between the outer and middle sole, as seen in Fig. 10. The reinforcing member may constitute and first and second reinforcing members (Fig. 6, 7).

Allowable Subject Matter

4. Claims 7-10, 14, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHARON M. PRANGE whose telephone number is (571)270-5280. The examiner can normally be reached on M-F 7:30-5.
